Chongqing is located at the "dragon tail" of the Yangtze economic belt and the inland of the Three Gorges Dam area. It is the economic center of Southwest China and upper reaches of the Yangtze River; it is also the gate of Southwest China on water route and a transport pivot of that region. Chongqing Jiangbei International Airport is the largest one of this kind in Western China. More than 70 lines have been opened that link up Chongqing with over 50 cities in China and other parts of the world, including direct international flights to Hong Kong and Macao regions of China, Tokyo and Nagoya, Bangkok, Seoul, Kuala Lumpur, Dusseldorf. Owing to its strong comprehensive strength in science and technology, a high level of scientific and technological development, a complete system of scientific research and development and a solid foundation for scientific and technological industry, Chongqing becomes a great power in the Western region, a S&T information center of upper reaches of the Yangtze River, and a modern base of high technology on the upper reaches of the Yangtze River.
